EDUCATION

- **Institut de Mathematiques et de Sciences Physiques (IMSP/UAC)** Dangbo, Benin
Master (2) of Science in Fundamental Mathematics and Applications Oct. 2018 – Present
- **Institut de Mathematiques et de Sciences Physiques (IMSP/UAC)** Dangbo, Benin
Master (1) of Science in Fundamental Mathematics and Applications Oct. 2017 – Jun. 2018
- **Ecole Superieure de Gestion d'Informatique et des Sciences (ESGIS)** Cotonou, Benin
Bachelor of Computer Science Oct. 2016 – Dec. 2017
- **Institut de Mathematiques et de Sciences Physiques (IMSP/UAC)** Dangbo, Benin
Bachelor of Mathematics Oct. 2015 – Jun. 2017
- **Institut de Mathematiques et de Sciences Physiques (IMSP/UAC)** Dangbo, Benin
Preparatory Classes in Mathematics and Physics (two-year highly selective classes) Oct. 2013 – Jun. 2015

EXPERIENCE

- **Solutis (solutis-it.com)** Cotonou, Benin
Software Craftsman Oct 2017 - Present
 - **SAC-TIC Project (sac-tic.tk) (Play Store)**: Resulting from the collaboration between various actors of the water sector, SAC-TIC makes it possible to be informed in case of break or disturbances of the water distribution network, to receive tricks and advices. Finally, I Develop the SAC-TIC project landing page.
 - **Solutis Website**: Design, build and optimize the company's website.
- **EtriLabs (etrilabs.com)** Cotonou, Benin
Jr Software Engineer Apr 2017 and Sep 2017
 - **Mongo Manager**: Allows to easily backup any mongodb database to a storage of your choice (AWS S3, Digital Ocean,...). Worked on the backend app with NodeJs and Express. Open Source repository: ([-mongomanager.ml-](#))
 - **Nymeria**: Development of a community marketplace for people to list, discover, and book unique accommodations online or from a mobile phone or tablet. Open Source repository: ([-mongomanager.ml-](#))
- **Python Benin User Group [Community]** Cotonou, Benin
Co Organizer (pythonbenin.com) December 2018 - Present
- **Google Developer Group Porto-Novo [Community]** Porto-Novo, Benin
Event Organizer and Speaker (meetup.com/GDG-Porto-Novo) Jan 2018 - Present
 - **Codelab: NodeJS Basics**: Evenement Date Resume Slide Link
 - **Codelab: Tensorflow**: Evenement Date Resume Slide Link

PROJECTS

- **Numerical analysis projects (Link)**: Rebuild of the the African Master of Machine Intelligence website ([aims-ammi.com](#)) to improve the rendering performance. Repository: [-github.com/kenn44/ammi-lightweight-](#)
- **Numerical optimization projects (Link)**: Rebuild of the the African Master of Machine Intelligence website ([aims-ammi.com](#)) to improve the rendering performance. Repository: [-github.com/kenn44/ammi-lightweight-](#)
- **AMMI Lightweight (Link)**: Rebuild of the the African Master of Machine Intelligence website ([aims-ammi.com](#)) to improve the rendering performance. Repository: [-github.com/kenn44/ammi-lightweight-](#)
- **Peekaboo (In progress) (Play Store)**: A real time cideo chat dating app. In charge of the backend development and technical project lead, I face multiple challenges: configuring CI/CD pipeline to automate testinf and deployment, implement realtime communication with Web Socket and WebRTC. I was able to work on new technologies such as Docker, Kubernetes and try new architectures: Serverless, GCP Compute Engine, AWS S3 (Cloud Storage).
- **Credit Scoring Model (Draft)**: At OpenSI ([opensi.co](#)), we start a project that aims to uses alternative data alongside of traditional to assess creditworthiness. The final goal is to improve the accessibility of persons excluded from banking institutions to credit. Notes are available at ([github.com/kenn44/credit-scoring101](#))
- **InoTech (Closed) (-ino-tech.tk-)**: Ino-tech is an ambitious media founded in 2017 to study and show how technology impact our lives.
